

Who Are Atelier Solutions?

Helping tech leaders and founders navigate their initial merger or acquisition to ensure it aligns with their strategic direction and is a success. Atelier Solutions does this by applying our extensive expertise and breadth of knowledge of different technologies to provide a proven plan unique to your organization. Our mission is to integrate the world.

We Help Answer These Critical Questions

- Will integrating the tech stack exceed the value we will get from the deal?
- What deadlines should be negotiated to be realistic?
- Will we be able to support and maintain this new ecosystem?
- Will we minimize our current and future customer impact?

Who We Partner With

- Private Equity and Venture backed companies

We work with your senior tech leaders to map out the best practices, tools, and processes to facilitate a smooth transition.

- Small-mid size companies about to make their first acquisition

We will work with your senior tech leaders to not only come up with the initial integration plans, but also help create the runbooks to make successive acquisitions easier and more successful.

Making an introduction...

If you have an introduction you'd like to make, you may want to use the following for your email intro:

"Chris is the president of Atelier Solutions. They help tech leaders and founders navigate through their first M&A from due diligence through planning and implementation. Here's his LinkedIn profile: <https://www.linkedin.com/in/cab105/>"

What Services Does Atelier Solutions Offer?
